Brand Identity and Logo

Introduction

Logomark Genesis

Logo Construction

- + Strive to reflect CSBC's USP, as being the **first behavioural institute in India** that provides **complete end to end solutions** that have **measurable impact at a human level**
- + Symbolically and literally **embody transformation and new learnings**
- + Celebrate the **super nerd** or the **agent of change**
- + Amplify CSBC as **the catalyst** that brings about **shift in thinking and behaviour** through **meaningful research and timely intervention**
- + Focus on the **human centric approach** and being **an integral part of the environment** it seeks to **grow and change**
- + Highlight CSBC as **an enabler that designs, creates and builds tools** that bring about change in local and marginalised communities
- + **Establish continuity with the current identity** through idea or form and a **symbolic connect** with the parent organisation
- + Be a **memorable and intelligent brand identity** that stands visually apart and **resonates with the people it serves and organisations** it and works with

The CSBC Ripple

CSBC design, creates and builds innovative tools that enables ripples of change in the community.

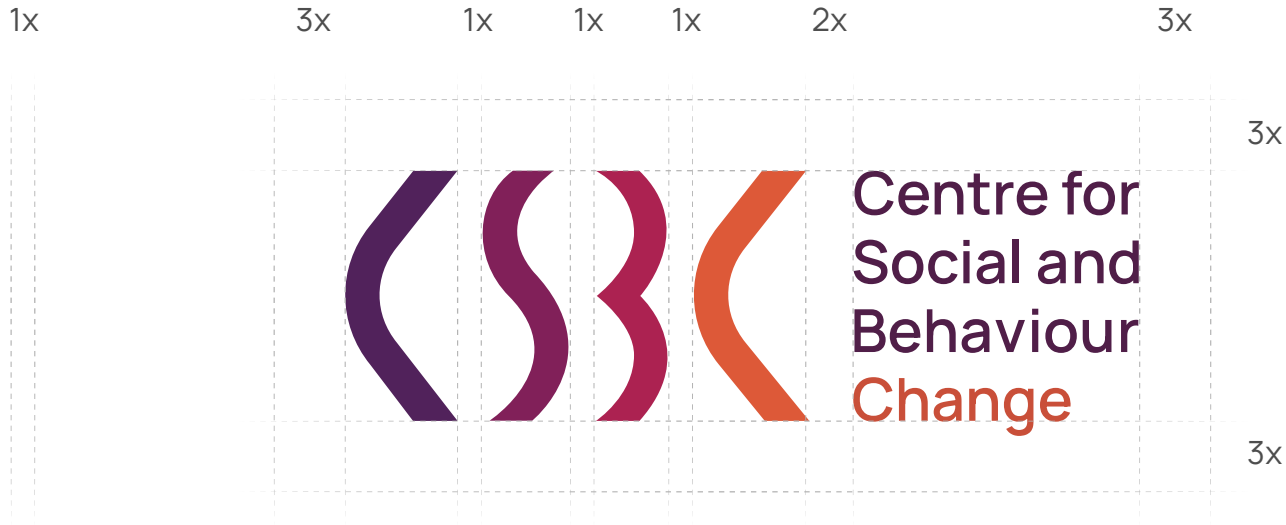

Keywords

- Catalyst
- Agent of transformation
- Connecting / interacting
- Impact

The Main logo consists of the Monogram and the Wordmark.

The distance between each alphabet is considered as a refernce for measurement.

Misuse

Placement

Partner Lock up

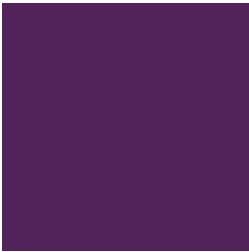

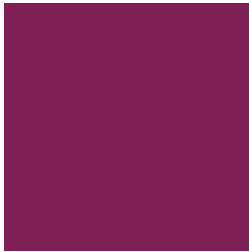

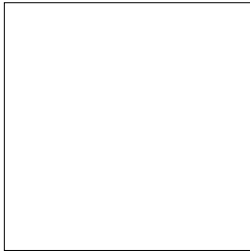

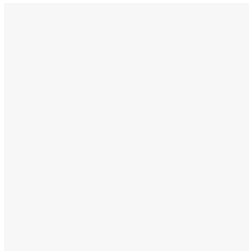

The CSBC story and mission is depicted through the pause points of a gradient.

Purple, Burgundy, Claret and a deep warm Orange signify key stages of transition and transformation. The colour family was developed to convey wisdom, decisiveness, warmth and a scientific temperament.

Primary Colours

Purple	Burgundy	Claret	Deep Orange	White	Light Grey
					
R 82 G 34 B 91	R 129 G 32 B 86	R 172 G 34 B 81	R 221 G 89 B 56	R 255 G 255 B 255	R 247 G 247 B 247
C 78 M 100 Y 12 K 13	C 44 M 100 Y 19 K 13	C 20 M 99 Y 37 K 6	C 0 M 76 Y 95 K 0	C 0 M 0 Y 0 K 0	C 0 M 0 Y 0 K 3
Hex #52225b	Hex #812056	Hex #ac2251	Hex #dd5938	Hex #ffffff	Hex #f7f7f7

4x amount of space should be left as an exclusion zone around the logo. Any other graphic graphic element, logo, typography should be placed outside of the exclusion zone.

35px is the minimum height for logo usage. Beyond this, the legibility of the wordmark is compromised.

Coloured

Monochrome

Monochrome

On a dark background, logo to be used with a white patch. Logo is always placed on either corner of an Image with sufficient margin from the sides

On a lighter background that offers enough contrast to the logo, the logo can be directly placed on the image, provided there is enough breathing space for the logo

Monogram to be used in case of repetitive use of logo, eg: presentation slides

Monogram to be used in case of repetitive use of logo, eg: presentation slides

Improving compliance of Complementary Feeding Practices

Complementary Feeding (CF) for 6-23 month old children is crucial for improving nutritional & growth outcomes. Measured as an adequate diet fed to a child, CF comprises 4 key components: Diet diversity (D), Quantity (Q), Frequency (F) & Consistency (C).

What is Behavioural Science?

Our behaviour and decision-making processes are governed by a host of factors. The different scientific disciplines that attempt to explain these comprise behavioural science.

System 1 vs System 2

Decision-making is a mixture of both system 1 and system 2 thinking. It can be considered a continuum rather than a discrete choice between systems.

Behavioural Economics

Behavioural economics combines elements of economics and psychology to understand how and why people behave the way they do in the real world. To understand this, consider this loss aversion and endowment effects.

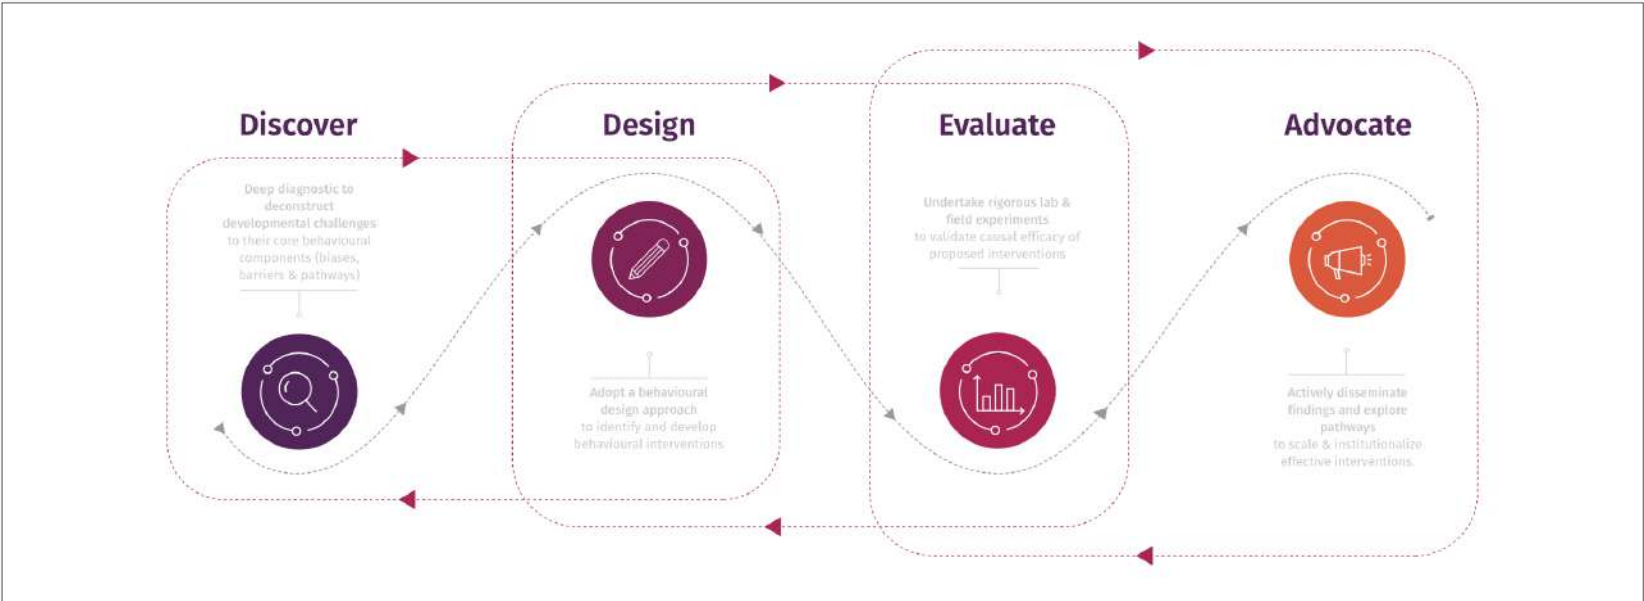

Behavioural Economics in Action

Similarly, anchoring and the Semmelweis reflex are examples of behavioural economics in action.

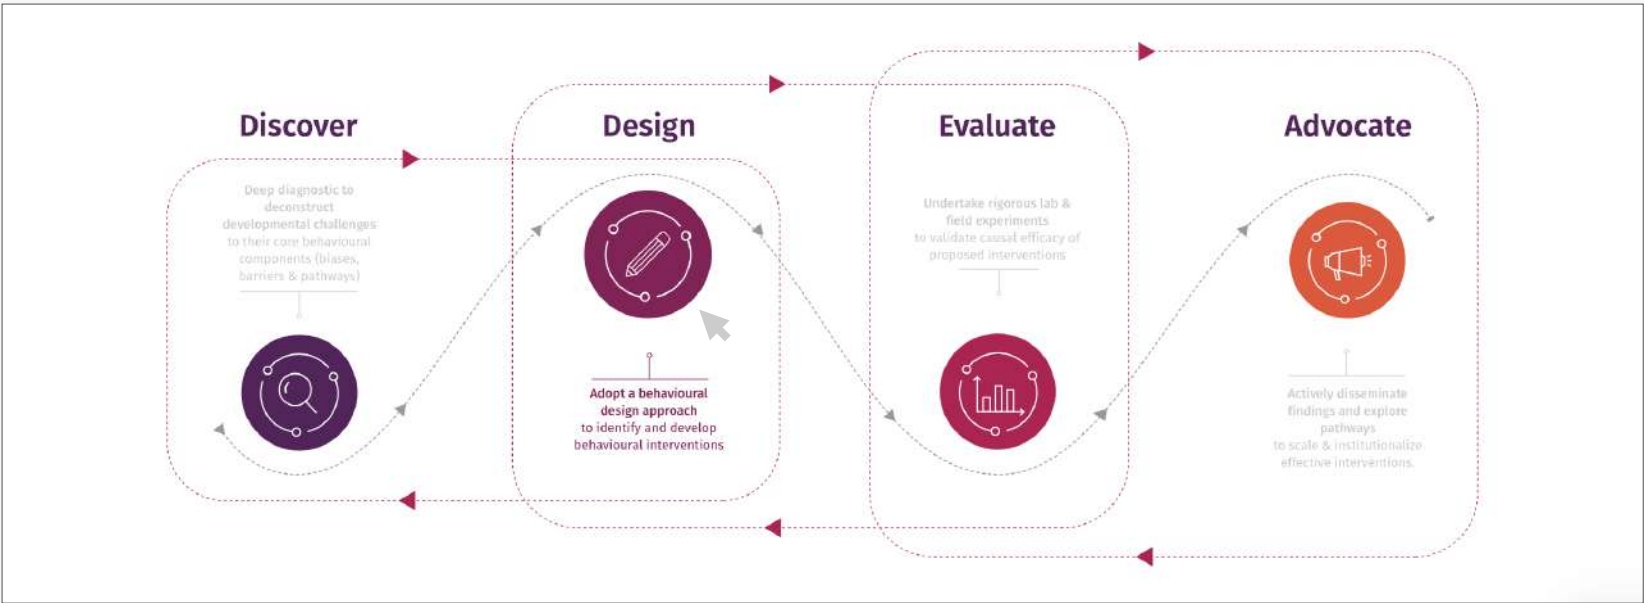

Loss Aversion & Endowment

The diagram illustrates two concepts: Loss Aversion and Endowment. Loss Aversion is described as the difficulty of convincing companies to change suppliers due to trust in the devil they know. It is accompanied by a bar chart showing 'PAIN FROM LOSS' is greater than 'PLEASURE FROM GAIN'. Endowment is described as people paying more for a product they know than one they don't. It is accompanied by a bar chart showing 'KNOWN PRODUCT' is valued higher than 'NEW PRODUCT'.

Partnerships

Behavioural Insights Units

We work closely with a range of government partners to bring about positive behavioural change in society through impactful policymaking and behavioural interventions.

Project Partners

We collaborate with multidisciplinary experts and reputed organisations on pioneering projects to test and identify behavioural problems and develop intervention strategies.

Academic Partnerships

Our partnerships with academic experts, other universities, and educational networks open up novel avenues for us to advance the quality of our research, kindling innovation.

Setting up India's Behavioural Insights Unit (BIU) within NITI Aayog

NITI Aayog, BMGF, and CSBC have signed a Statement of Intent effective for 3 years to set up a Behavioural Insights Unit (BIU) to help improve pre-defined indicators within the Aspirational Districts of India

3 Key Deliverables

Pilot Projects:

Define and Diagnose behaviors linked to 6 priority indicators

- Design interventions to overcome barriers

- Test in lab + lab in the field settings

- Pilot (wherever feasible)

- Provide support for Impact evaluation

- Scaling plan of best practices

Knowledge / Capacity Building:

Knowledge portal with evidence-based learnings and successful interventions in behavioral science

- Publications on BeSci in India

- Trainings workshops and expert convenings

Setting up an Internal Unit at NITI Aayog:

- People

- Governance

- Mandate

- Funding

- Collaborations

CSBC conducts its research through a well-established testing infrastructure.

1 Behaviour Lab at Ashoka

We have set up a Behaviour Lab at Ashoka University, Sonapat, which allows us to run rapid experiments with a readily available pool of respondents from the Ashoka student body.

2 Mobile Experiments

We also have an agile mobile experimental lab setup with infrastructure to test behavioural interventions and run studies in remote setting and locations.

3 Emprics at a Distance

Currently, we are developing protocols to conduct research remotely through online platforms supplemented by on-ground data collected via partners and community members. We have conducted study pilots leveraging community mobilisers to deploy our interventions via WhatsApp, and the results are promising.

Our Vision

Building an institution in India that is globally reputed for impactful behaviour change interventions for low-income and marginalised populations.

Founded by and a part of Ashoka University

Part of Ashoka University, India's leading liberal arts university; focused in interdisciplinary thinking.

Supported by the Bill and Melinda Gates Foundation

Funded by a grant from the Bill & Melinda Gates Foundation.

36

What We Do

Our work is distributed across three verticals that inform and interact with each other

Behavioural Design & Impact

- Designing 360-degree behaviour change programmes through which we seek to generate impact at scale.
- Designing and testing behaviourally-informed interventions with the aim to have impact at scale

Behavioural Insights Units (BIUs)

- Establishing Behavioural Insights Unit networks in India, both centrally and with state governments, demonstrating impact across key programmes
- Designing evidence-driven behavioural solutions to strengthen policy outcomes across sectors

Research

- Filling gaps in our field's understanding of how behaviour science works in the Indian context, and building local knowledge on how and where to use behaviour science.

Academic Research Agenda

The CSBC research team has set out a multi-year research agenda. The main focus is towards advancing our understanding of behaviour science, and its application to public policy problems in a developing country context. Some of these include:

Understanding the interaction between intrinsic and extrinsic factors and their roles in decision-making

Exploring and strengthening the adoption of scientific evidence for public policy outcomes

Understanding the underpinnings of gender-based norms and their roles in development outcomes

Development of better outcome measurements for methodological advances and promote interdisciplinary learnings

Incorporating use of new and existing artificial intelligence and machine learning techniques for application in challenges of development

Why we are Unique

Evidence Based

We provide evidence-based interventions and develop critical drivers for solving behavioural challenges, to drive noticeable and impactful changes at the grass-root level.

Robust Lab Infrastructure

Our behaviour lab is a global platform, allowing academicians and researchers to conduct experiments, access data resources, test behavioural interventions, and collaborate effectively with CSBC.

Iterative Process

Our process involves designing interventions and receiving feedback from target groups at every step of the way to ensure meaningful impact.

Mass Media to IPC to Digital

We design interventions across formats, i.e., from messaging to physical products/nudges, and across channels of delivery, i.e. from mass media to interpersonal communication.

Multi-Disciplinary Teams and Partners

We're driven by a diverse group of partners such as academic institutions, implementation partners, and policy influencers, who make a difference through a shared vision.
